

## Section 6 Lesson 6 Exercise 1: Retrieving Data Using SELECT

### Part 1: Retrieving all columns from a table.

#### 1. customers

**SELECT \*FROM customers**

CTR_NUMBER	EMAIL	FIRST_NAME	LAST_NAME	PHONE_NUMBER	CURRENT_BALANCE	SRE_ID	TEM_ID	LOYALTY_CARD_NUMBER
c00001	bob.thornberry@heatmail.com	Robert	Thornberry	01234567898	150	sr01	t001	-
c00012	Jjones@freemail.com	Jennifer	Jones	01505214598	0	-	-	lc1015
c00101	unknown@here.com	John	Doe	03216547808	987.5	sr01	t002	-
c00103	MurciaA@globaltech.com	Andrew	Murcia	07715246890	85	-	-	lc2341
c01986	margal87@delphiview.com	Maria	Galant	01442736589	125.65	sr03	t003	-
c02001	brianrog@hootech.com	Brian	Rogers	01654564898	50	-	-	lc4587

#### 2. teams

**SELECT \*FROM teams**

ID	NAME	NUMBER_OF_PLAYERS	DISCOUNT
t001	Rockets	25	10
t002	Celtics	42	20
t003	Rovers	8	-
t004	Jets	10	5

#### 3. items

**SELECT \*FROM items**

ITM_NUMBER	NAME	DESCRIPTION	CATEGORY	COLOR	Size	ILT_ID
im01101044	gloves	catcher mitt	clothing	brown	m	il010230124
im01101045	under shirt	top worn under the game top	clothing	white	s	il010230125
im01101046	socks	team socks with emblem	clothing	range	l	il010230126
im01101047	game top	team shirt with emblem	clothing	range	m	il010230127
im01101048	premium bat	high quaity baseball bat	equipment	-	-	il010230128

### Part 2: Selecting Specific Columns

1. Display the customer number, first name, last name, email and phone number of the customers.

**SELECT** ctr\_number, first\_name, last\_name, email, phone\_number  
**FROM** customers;

CTR_NUMBER	FIRST_NAME	LAST_NAME	EMAIL	PHONE_NUMBER
c00001	Robert	Thornberry	bob.thornberry@heatmail.com	01234567898
c00012	Jennifer	Jones	Jjones@freemail.com	01505214598
c00101	John	Doe	unknown@here.com	03216547808
c00103	Andrew	Murcia	MurciaA@globaltech.com	07715246890
c01986	Maria	Galant	margal87@delphiview.com	01442736589
c02001	Brian	Rogers	brianrog@hootech.com	01654564898

2. Display the name and number of players for each team.

**SELECT** name, number\_of\_players  
**FROM** teams;

NAME	NUMBER_OF_PLAYERS
Rockets	25
Celtics	42
Rovers	8
Jets	10

3. Display the name, description and category for every item in the table.

**SELECT** name, description, category  
**FROM** items;

FIRST_NAME	LAST_NAME	CTR_NUMBER	CURRENT_BALANCE	CURRENT_BALANCE-5
Robert	Thornberry	c00001	150	145
Jennifer	Jones	c00012	0	-5
John	Doe	c00101	987.5	982.5
Andrew	Murcia	c00103	85	80
Maria	Galant	c01986	125.65	120.65
Brian	Rogers	c02001	50	45

3. What would be the problem with implementing this scheme?

After the 'current\_balance' which is 0 being reduced by 5 the 'current\_balance-5' is -5, it is not logic in real world.

## Part 2 : Using Column Aliases

1. You previously wrote a query that display the customer's first name, last name, current balance and monthly payment. Rewrite the query to use First Name, Last Name, Balance and Monthly Repayments as the column aliases. The aliases are to be shown exactly as described (case sensitive).

```
SELECT first_name "First Name", last_name "Last Name", current_balance "Balance",  
current_balance/12 "Monthly Repayments"  
FROM customers;
```

[illegible]

## Part 3: Using Literal Character Strings

1. Write a query that will display the team information in the following format: The Rockets team has 25 players and receives a discount of 10 percent. Use Team Information as the column alias.

```
SELECT 'The ' || name || ' team has ' || number_of_players || ' player and receives a
discount of ' || discount || ' percent.' "Team Information"
FROM teams;
```

Team Information
The Rockets team has 25 player and receives a discount of 10 percent.
The Celtics team has 42 player and receives a discount of 20 percent.
The Rovers team has 8 player and receives a discount of    percent.
The Jets team has 10 player and receives a discount of 5 percent.

2. Why does the last team not show a discount?  
The discount of the last team is null.

## Section 6 Lesson 7 Exercise 1: Restricting Data Using WHERE

## Part 1: Using the WHERE Clause.

1. Using the unique customer number in the where clause display all columns for Maria Galant.

```
SELECT *  
FROM customers  
WHERE ctr_number='c01986';
```

CTR_NUMBER	EMAIL	FIRST_NAME	LAST_NAME	PHONE_NUMBER	CURRENT_BALANCE	SRE_ID	TEM_ID	LOYALTY_CARD_NUMBER
c01986	margal87@delphiview.com	Maria	Galant	01442736589	125.65	sr03	t003	-

2. Display the first name, last name and customer number for all customers who have a current balance of greater than 100. Use an appropriate alias for your column headings. 3. Display the order id, date and time of all orders that were placed before the 28th of May 2019. Use an appropriate alias for your column headings.

```
SELECT first_name, last_name, ctr_number  
FROM customers  
WHERE current_balance>100;
```

FIRST_NAME	LAST_NAME	CTR_NUMBER
Robert	Thornberry	c00001
John	Doe	c00101
Maria	Galant	c01986

3. Display the order id, date and time of all orders that were placed before the 28th of May 2019. Use an appropriate alias for your column headings.

```
SELECT id, odr_date, odr_time  
FROM orders  
WHERE odr_date < TO_DATE('28-May-2019', 'DD-MM-YYYY');
```

ID	ODR_DATE	ODR_TIME
or0101250	17-APR-17	17-APR-17
or0101350	24-MAY-17	24-MAY-17
or0101425	28-MAY-17	28-MAY-17
or0101681	02-JUN-17	02-JUN-17
or0101750	18-JUN-17	18-JUN-17

## Part 2: Range Conditions: BETWEEN Operator

1. Display the inventory id, cost and number of units using appropriate aliases for all items that have a trade cost of between 3.00 and 15.00.

**SELECT \***

**FROM inventory\_list**

**WHERE cost BETWEEN 3.00 AND 15.00;**

ID	COST	UNITS
il010230125	7.99	250
il010230126	5.24	87

## Part 3: Membership Conditions: IN Operator

1. Display the inventory id, cost and number of units using appropriate aliases for all items that have 50, 100, 150 or 200 units in stock.

**SELECT \***

**FROM inventory\_list**

**WHERE units IN(50,100,150,200);**

ID	COST	UNITS
il010230124	2.5	100

#### Part 4: Membership Conditions: NOT IN Operator

1. Display the inventory id, cost and number of units using appropriate aliases for all items that do not have 50, 100, 150 or 200 units in stock.

```
SELECT *  
FROM inventory_list  
WHERE units NOT IN(50,100,150,200);
```

ID	COST	UNITS
il010230125	7.99	250
il010230126	5.24	87
il010230127	18.95	65
il010230128	97.46	8

#### Part 5: Pattern Matching: LIKE Operator

1. Display item number and name of all items that have a name that begins with g. Use an appropriate alias for your column headings.

```
SELECT itm_number "Item Number", name "Item Name"  
FROM items  
WHERE name LIKE 'g%';
```

Item Number	Item Name
im01101044	gloves
im01101047	game top

#### Part 6 : Pattern Matching: Combining Wildcard Characters with the LIKE Operator

1. Display item number and name of all items that have a name that contain a lowercase o. Use an appropriate alias for your column headings.

```
SELECT itm_number "Item Number", name "Item Name"  
FROM items  
WHERE name LIKE '%o%';
```

Item Number	Item Name
im01101044	gloves
im01101046	socks
im01101047	game top

## Section 6 Lesson 7 Exercise 2: Restricting Data Using WHERE

### Part 1: Using the NULL Conditions

1. Write a query that will display information for teams that don't receive a discount in the following format: The Rovers team has 25 players and does not receive a discount. Use Team Information as the column alias.

```
SELECT 'The' || name || ' team has ' || number_of_players || ' players and does not receive a discount.' "Team Information"
FROM teams
WHERE discount IS NULL;
```

Team Information
TheRovers team has 8 players and does not receive a discount.

2. Write a query that will display information for only teams that receive a discount in the following format: The Rockets team has 25 players and receives a discount of 10 percent. Use Team Information as the column alias.

```
SELECT 'The' || name || ' team has ' || number_of_players || ' players and receives a discount of ' || discount || ' percent.' "Team Information"
FROM teams
WHERE discount IS NOT NULL;
```

Team Information
TheRockets team has 25 players and receives a discount of 10 percent.
TheCeltics team has 42 players and receives a discount of 20 percent.
TheJets team has 10 players and receives a discount of 5 percent.

### Part 2: Logical Operators: AND

1. Write a query that will display the customer number, address line 1 and postal code for customers that live in the starford area of Liverpool. Use Customer Number, Street Address and Postal Code as the column aliases.

```
SELECT ctr_number "Customer Number", address_line_1 "Street Address", zip_code  
"Postal Code"  
FROM customers_addresses  
WHERE city='Liverpool' AND address_line_2='starford';
```

no data found

### Part 3: Logical Operators: OR

1. Write a query that will display the customer number, address line 1 and postal code for customers that live in either starford or Liverpool in general. Use Customer Number, Street Address and Postal Code as the column aliases.

```
SELECT ctr_number "Customer Number", address_line_1 "Street Address", zip_code  
"Postal Code"  
FROM customers_addresses  
WHERE city='Liverpool' AND address_line_2='starford';
```

Customer Number	Street Address	Postal Code
c00001	83 Barrhill Drive	LP79HJK
c00001	17 Gartsquare Road	LP89JHK
c00001	63 Acacia Drive	LP83JHR

### Part 4: Logical Operators: NOT Equal To

1. Write a query that will display the customer number, address line 1 and postal code for customers that do not live in Liverpool. Use Customer Number, Street Address and Postal Code as the column aliases.

```
SELECT ctr_number "Customer Number", address_line_1 "Street Address", zip_code  
"Postal Code"  
FROM customers_addresses  
WHERE city<>'Liverpool';
```

Customer Number	Street Address	Postal Code
c00101	54 Ropehill Crescent	ST45AGV
c01986	36 Watercress Lane	JP23YTH

## Section 6 Lesson 8 Exercise 1: Sorting Data Using ORDER BY

1. Display the team name and number of players alphabetically in order of team name. Use an appropriate alias for your column headings.

```
SELECT name "Team Name", number_of_players "Number Of Players"
FROM teams
ORDER BY name;
```

Team Name	Number Of Players
Celtics	42
Jets	10
Rockets	25
Rovers	8

2. Display the team name and number of players in descending order of number of players. Use an appropriate alias for your column headings.

```
SELECT name "Team Name", number_of_players "Number Of Players"
FROM teams
ORDER BY number_of_players DESC;
```

Team Name	Number Of Players
Celtics	42
Rockets	25
Jets	10
Rovers	8

3. Display the team name and number of players alphabetically in order of team name. Use Team Name for the name alias and Players for the number of players. Sort the output in descending order of name using the alias in the ORDER BY clause.

**SELECT name "Team Name", number\_of\_players "Players"**  
**FROM teams**  
**ORDER BY name DESC;**

Team Name	Players
Rovers	8
Rockets	25
Jets	10
Celtics	42

## Section 6 Lesson 8 Exercise 2: Sorting Data Using ORDER BY

### Part 1 : TOP-N-ANALYSIS (S6L8 Objective 3)

1. The customers are numbered sequentially with each new customer being assigned a higher customer number. Use TOP-N-ANALYSIS to only show the First and last name of the first three customers. Show the customers first and last name in the same column using Customer Name as the column alias.

**SELECT ROWNUM "Top 3 Customers", first\_name || ' ' || last\_name "Customer Name"**  
**FROM**  
**(SELECT first\_name, last\_name**  
**FROM customers**

**ORDER BY ctr\_number)**  
**WHERE ROWNUM <=3;**

Top 3 Customers	Customer Name
1	Robert Thornberry
2	Jennifer Jones
3	John Doe

Part 2 : Using a Substitution Variable (S6L8 Objective 4)

1. Use a substitution variable that will allow you to enter the commission rate for the sales representatives. The first and last names should be displayed to screen for any sales representatives that earn that commission rate and the output should be ordered by their last name. Use an appropriate alias for your column headings.

**SELECT first\_name "First Name", last\_name "Last Name"**  
**FROM sales\_representatives**  
**WHERE commission\_rate= 5**  
**ORDER BY last\_name;**

First Name	Last Name
Barry	Speed
Victoria	Wright

**SELECT first\_name "First Name", last\_name "Last Name"**  
**FROM sales\_representatives**  
**WHERE commission\_rate= 10**  
**ORDER BY last\_name;**

First Name	Last Name
Charles	Raymond
