1 Introduction

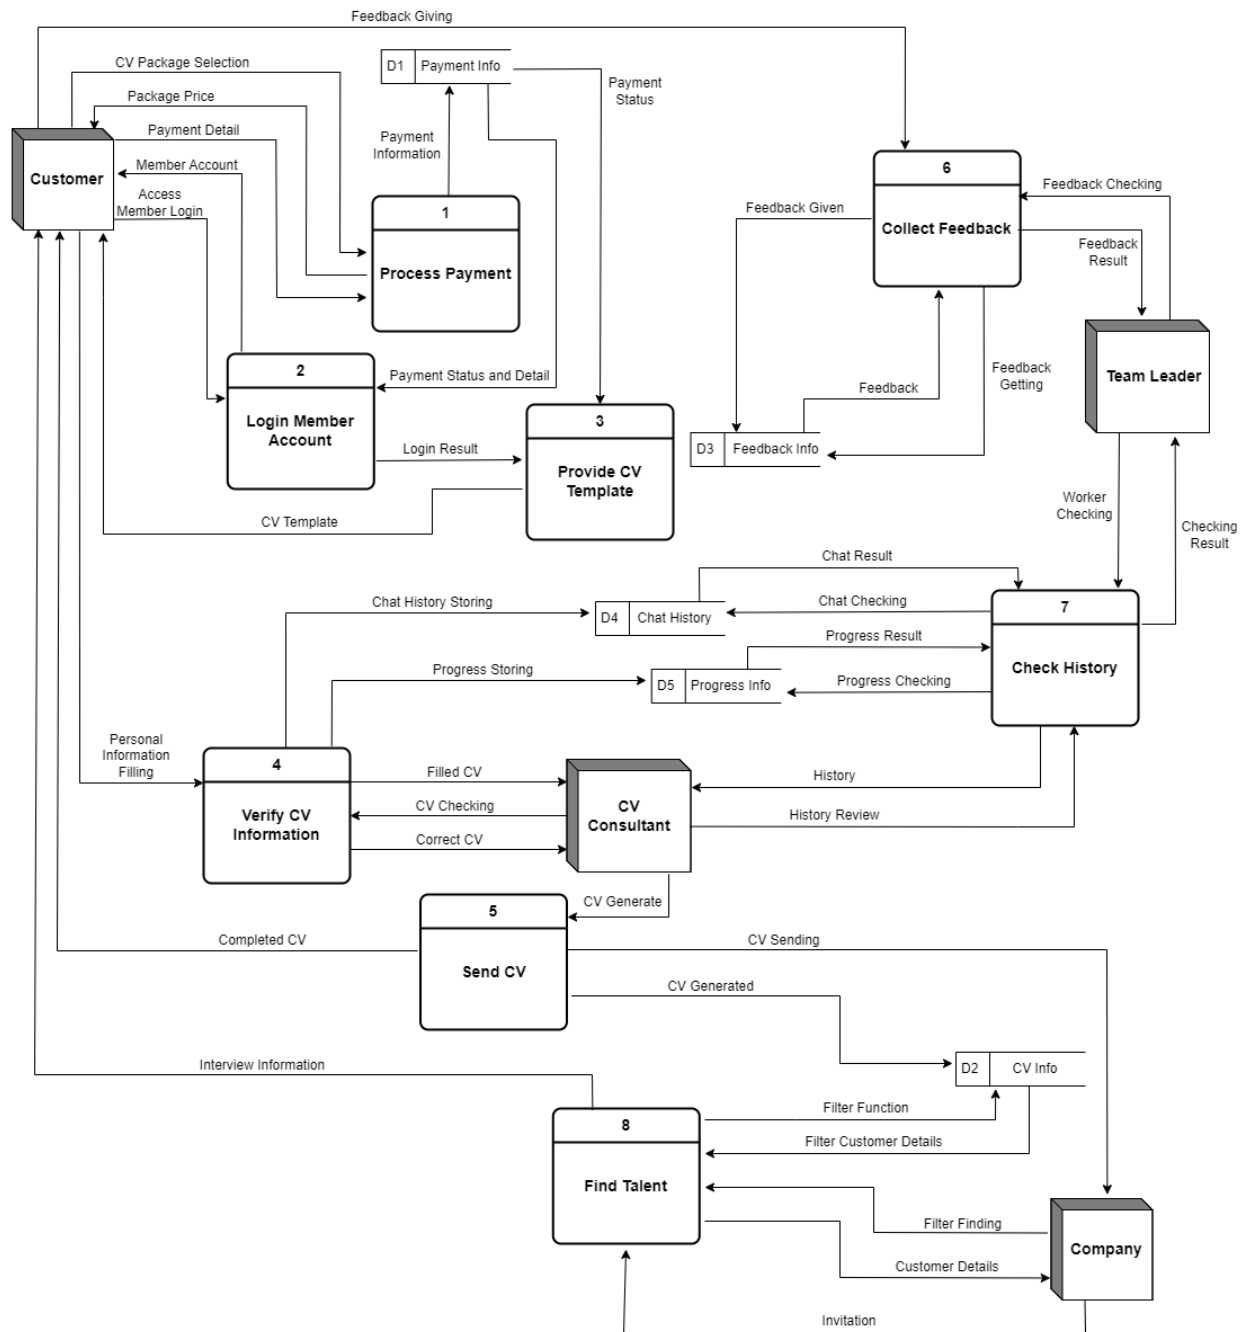

After finishing the interview session with one of the workers from “GetMe Hired”, the interviewee has provided our team a lot of relevant information regarding the improvement or enhancement that can be implemented to the current system. In order to enhance the user experience, several specific improvements and new features will be introduced to the current system. For example, a new database system will be designed in order to improve the productivity and efficiency of users. Other than that, filtering features will also be included for sorting and selecting the information needed in the database and there are still many useful functionalities to be implemented. Therefore, the data flow diagrams which visualize our team’s proposed system will be created and introduced firstly. Apart from that, discussion of the proposed business and transaction requirements of “GetMe Hired” will be carried out along with the updated database conceptual design which includes the conceptual ERD and enhanced ERD (EERD) but also the data dictionary. Hence, by carrying out these processes, it will aid our team to proceed and continue with the next phase of this project later.

3 Data & Transaction Requirement

3.1 Proposed Business Rule

1. Each customer may purchase one CV package.
2. Every customer may provide one CV draft information.
3. One customer may only request one CV generating status.
4. Each customer may make a payment.
5. Each customer can only receive one CV.
6. Each payment is owned by one CV package.
7. Each worker can generate at least one CV.
8. Each worker can receive at least one CV draft.
9. Each customer can only submit one CV draft.
10. Each company can obtain at least one final CV.
11. This website operates 24 hours except for maintenance.

3.2 Proposed Data & Transactional

Transactions are referred to the operations in a database which are data entry, data delete/updates and data queries. In our project there are several transactions requirement:

Data Entry:

1. Enter the details of customers
2. Enter the details of CV package
3. Enter the details of payment
4. Enter the details of CV information
5. Enter the details of CV draft
6. Enter the details of CV generating status
7. Enter the details of CV
8. Enter the details of worker
9. Enter the details of company
10. Enter the details of feedback
11. Enter the details of chat history

Data Updates/Deletion:

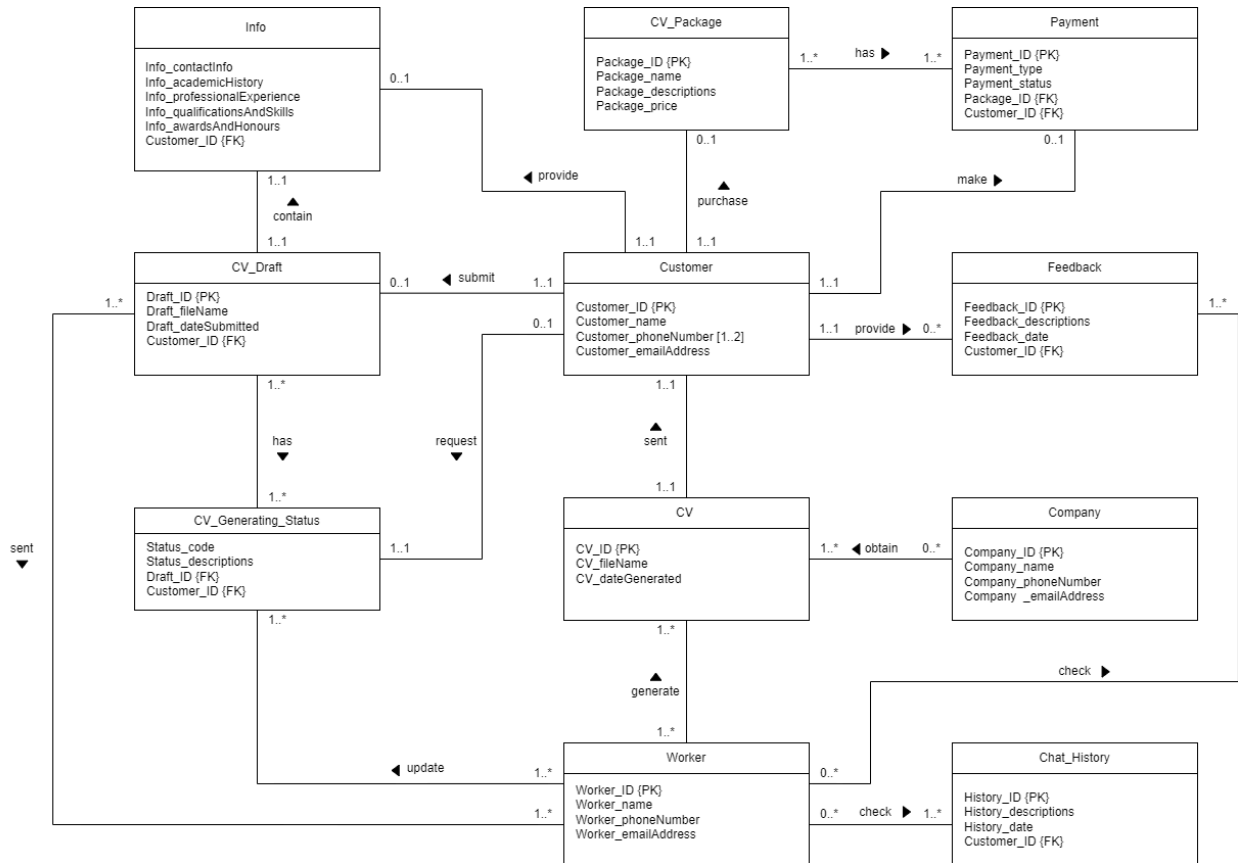

1. Update the details of customers
2. Update the details of CV package
3. Update the details of payment
4. Update the details of CV information
5. Update the details of CV draft
6. Update the details of CV generating status
7. Update the details of CV
8. Update the details of worker
9. Update the details of company
10. Update the details of feedback
11. Update the details of chat history

Data Queries:

1. List the details of customers
2. List the details of CV package
3. List the details of payment
4. List the details of CV information
5. List the details of CV draft
6. List the details of CV generating status
7. List the details of CV final
8. List the details of worker
9. List the details of company
10. List the details of feedback
11. List the details of chat history

4 Database conceptual design

4.1 Conceptual ERD

5 Data Dictionary

5.1 Description of Entities

| Entity | Description | Occurrence |
|------------|--|---|
| Customer | General term describing all the customers (job seeker) in “GetMe Hired” | <p>Each customer registers their accounts</p> <p>Each customer may purchase one CV package and makes payment for it</p> <p>Each customer may provide their information to be included in the CV draft</p> <p>Each customer submits a CV draft and request their CV generating status</p> <p>Each customer receives the CV generated and may provide many feedback based on the services provided by “GetMe Hired”</p> |
| CV_Package | General term describing all the provided CV package by “GetMe Hired” | <p>Each CV package may purchased by one customer</p> <p>Each CV package has one or many payment</p> |
| Payment | General term describing all the payment made by customers | <p>Each payment may made by one customer</p> <p>Each payment owned by one or many CV packages</p> |
| Info | General term describing all the data that have been filled by customer in their CV draft | <p>Each Info may provided by one customer</p> <p>Each Info is included in one CV draft</p> |

| | | |
|----------------------|---|--|
| CV_Draft | General term describing all the draft that have been submitted by the customer to “GetMe Hired” | <p>Each CV draft may submitted by one customer</p> <p>Each CV draft contains one Info</p> <p>Each CV draft is sent to one or many workers.</p> <p>Each CV draft has one or many CV generating status</p> |
| Worker | General term describing all the workers of “GetMeHired” | <p>Each worker receives one or many CV drafts</p> <p>Each worker updates one or many CV generating status</p> <p>Each worker generates one or many CV</p> <p>Each worker checks one or many chat histories</p> <p>Each worker checks one or many feedbacks</p> |
| CV_Generating_Status | General term describing the current status of generating CV | <p>Each CV generating status is requested by none or one customer</p> <p>Each CV generating status is updated by one or many workers</p> <p>Each CV generating status is correspond to one or many CV drafts</p> |
| Chat_History | General term describing all the chat history between worker and customer | Each customer chat history can be checked by none or many workers |

| | | |
|----------|---|---|
| CV | General term describing all the generated CV by the workers | <p>Each CV is generated by one or many workers</p> <p>Each CV is sent to one customer</p> <p>Each CV may obtained by none or many recruiter</p> |
| Feedback | General term describing all the feedback given by customer | <p>Each customer feedback is provided by one customer</p> <p>Each customer feedback is checked by none or many workers</p> |
| Company | General term describing all the Company (recruiter) that used “GetMe Hired” | Each company obtains one or many CV |

5.2 Description of Relationship

| Entity | Multiplicity | Relationship | Multiplicity | Entity |
|------------|--|--|--|---|
| Customer | 1..1 1..1 1..1 1..1 0..1 1..1 1..1 | Purchase Make Provide Submit Request Receive Provide | 0..1 0..1 0..1 0..1 1..1 1..1 1..* | CV_Package Payment Info CV_Draft CV_Generating_Status CV Feedback |
| CV_Package | 1..* | Has | 1..* | Payment |
| CV_Draft | 1..1 1..* 1..* | Contain Has Sent | 1..1 1..* 1..* | Info CV_Generating_Status Worker |
| Worker | 1..* 1..* 0..* 0..* | Update Generate Check Check | 1..* 1..* 1..* 1..* | CV_Generating_Status CV Chat_History Customer Feedback |
| Company | 0..* | Obtain | 1..* | CV |

5.3 Description of Attributes

| Entity | Attributes | Description | Data Type | Constraint | Multi-valued |
|------------|------------------------|--------------------------------|----------------|--|--------------|
| Customer | Customer_ID | Uniquely identifies a customer | VARCHAR2(15) | PRIMARY KEY | no |
| | Customer_name | Name of customer | VARCHAR2(30) | NOT NULL | no |
| | Customer_phone Number | Phone number of customer | VARCHAR2(12) | NOT NULL | yes |
| | Customer_email Address | Email address of customer | VARCHAR2(30) | NOT NULL | no |
| CV_Package | Package_ID | Uniquely identifies a package | VARCHAR2(15) | PRIMARY KEY | no |
| | Package_name | Name of package | VARCHAR2(30) | NOT NULL | no |
| | Package_descriptions | Description of package | VARCHAR2(4000) | NOT NULL | no |
| | Package_price | Price of package | DECIMAL(8,2) | NOT NULL | no |
| Payment | Payment_ID | Uniquely identifies a payment | VARCHAR2(15) | PRIMARY KEY | no |
| | Payment_type | Type of payment | CHAR(1) | NOT NULL | no |
| | Payment_status | Payment status | CHAR(1) | NOT NULL | no |
| | Package_ID | Referenced package ID | VARCHAR2(25) | -FOREIGN KEY REFERENCE CV PACKAGE | no |
| | Customer_ID | Referenced customer ID | VARCHAR2(15) | -FOREIGN KEY REFERENCE CUSTOMER | no |

| | | | | | |
|----------|------------------------------|--|----------------|------------------------------------|-----|
| Info | Info_contactInfo | Contact information that filled in CV template | VARCHAR2(4000) | NOT NULL | yes |
| | Info_academicHistory | Academic history that filled in CV template | VARCHAR2(4000) | NOT NULL | yes |
| | Info_professionalExperience | Professional experience that filled in CV template | VARCHAR2(4000) | - | yes |
| | Info_qualificationsAndSkills | Qualifications and skills that filled in CV template | VARCHAR2(4000) | - | yes |
| | CV_awardsAndHonours | Awards and honors that filled in CV template | VARCHAR2(4000) | - | yes |
| | Customer_ID | Referenced customer ID | VARCHAR2(15) | -FOREIGN KEY REFERENCE CUSTOMER | no |
| CV_Draft | Draft_ID | Uniquely identifies a CV draft | VARCHAR2(15) | PRIMARY KEY | no |
| | Draft_fileName | File name of CV draft | VARCHAR2(40) | NOT NULL | no |
| | Draft_dateSubmitted | Date submitted the CV draft | DATE | NOT NULL | no |
| | Customer_ID | Referenced customer ID | VARCHAR2(15) | -FOREIGN KEY REFERENCE CUSTOMER | no |
| Worker | Worker_ID | Uniquely identifies a “GetMe Hired” worker | VARCHAR2(15) | PRIMARY KEY | no |
| | Worker_name | Name of worker | VARCHAR2(30) | NOT NULL | no |
| | Worker_phoneN | Phone number of | VARCHAR | NOT NULL | yes |

| | | | | | |
|----------------------|----------------------|---|----------------|------------------------------------|-----|
| | umber | worker | 2(12) | | |
| | Worker_emailAddress | Email address of worker | VARCHAR2(30) | NOT NULL | no |
| CV_Generating_Status | Status_code | Code of status for generation of CV | VARCHAR2(15) | NOT NULL | no |
| | Status_descriptions | CV generating descriptions | VARCHAR2(100) | NOT NULL | no |
| | Customer_ID | Referenced customer ID | VARCHAR2(15) | -FOREIGN KEY REFERENCE CUSTOMER | no |
| | Draft_ID | Referenced CV draft ID | VARCHAR2(15) | -FOREIGN KEY REFERENCE CV DRAFT | no |
| Chat_History | History_ID | Uniquely identifies a customer chat history | VARCHAR2(15) | PRIMARY KEY | no |
| | History_descriptions | Title of chat history | VARCHAR2(4000) | NOT NULL | no |
| | History_date | Date of chat history | DATE | NOT NULL | yes |
| | Customer_ID | Referenced customer ID | VARCHAR2(15) | -FOREIGN KEY REFERENCE CUSTOMER | no |
| CV | CV_ID | Uniquely identifies CV generated | VARCHAR2(15) | PRIMARY KEY | no |
| | CV_fileName | File name of CV | VARCHAR2(40) | NOT NULL | no |
| | CV_dateGenerated | Date generated the CV | DATE | NOT NULL | no |
| Feedback | Feedback_ID | Uniquely identifies a customer feedback | VARCHAR2(15) | PRIMARY KEY | no |
| | Feedback_description | Feedback | VARCHAR | NOT NULL | no |

| | | | | | |
|---------|-----------------------|-----------------------------------|---------------|---------------------------------|-----|
| | ptions | descriptions of customer provides | 2(4000) | | |
| | Feedback_date | Date customer gives the feedback | DATE | NOT NULL | no |
| | Customer_ID | Referenced customer ID | VARCHAR 2(15) | -FOREIGN KEY REFERENCE CUSTOMER | no |
| Company | Company_ID | Uniquely identifies a recruiter | VARCHAR 2(15) | PRIMARY KEY | no |
| | Company_name | Name of recruiter | VARCHAR 2(30) | NOT NULL | no |
| | Company_phone Number | Phone number of recruiter | VARCHAR 2(12) | NOT NULL | yes |
| | Company_email Address | Email address of recruiter | VARCHAR 2(30) | NOT NULL | no |

6 Summary

In conclusion, the proposed system has taken account of the expectations and concerns from the users of the current system in “GetMe Hired”. Nevertheless, some of the useful features provided in the current system are maintained and new features or functionalities are provided and introduced in order for the improvement and enhancement of the user experience. Therefore, a more user-friendly system for “GetMe Hired” will allow the efficiency and reliability for the stakeholders for organization in the company status.

Based on the information gathered and collected, the analysis of user requirements and recommendations has been carried out in order to produce this proposed system. A lot of ideas and opinions have helped our team to determine the main focus for improvement. For example, the proposed “GetMe Hired” system will include the functionalities of storing chat history, filtering features of CV generated and efficiency and effectiveness checking of the users and stakeholders and others.

Therefore, our team has an expectation that the system stakeholders will undoubtedly gain benefits which enhance the efficiency and productivity of the system. A win-win situation will then be fulfilled for all stakeholders which includes the customer, workers and recruiter and thus develop a more acceptable, adequate and favorable user experience.
